

# MUHAMMAD ALI ADEEL

Karachi, Pakistan | +92 331 2102587 | aliadeel2k19@gmail.com | GitHub | LinkedIn | Portfolio

Full-Stack MERN Developer and BS Data Science student at FAST-NUCES, with a track record of shipping production-grade web apps and AI-powered systems. Passionate about building tools that are fast, intelligent, and genuinely useful.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript, Modern UI

**Backend:** Node.js, Express.js, REST APIs, Python, Agentic AI / LLM Integration

**Data & DevOps:** MongoDB, SQL, Firebase, Docker, Vercel, Git, Postman

**Specialized:** Web3 / Blockchain, System Security Auditing, Machine Learning

## EXPERIENCE

**MERN Stack Developer** · Freelance / VentureJan 2025 – Present

- **Designed and deployed** secure, scalable web apps for **local** and **international** clients using the **full MERN stack**.
- Reduced load times by 40% on high-traffic sites through lazy-loading, code-splitting, and optimized state management.
- Independently managed full project lifecycle — from **architecture** and **development** to deployment on **Vercel** and client handoff.

**Wordpress Developer** · Insight solution , Karachi Jan 2025 – Aug 2025

- **Scalable Web Ecosystems & CMS Architecture:** Engineered and managed a suite of WordPress-based platforms, including high-traffic blogs and corporate portals, utilizing custom themes and optimized plugin architectures to ensure **99.9% uptime** and seamless content delivery.
- **ERP System Integration & Lifecycle Management:** Spearheaded the development and maintenance of a custom **ERP system**, automating core business workflows and data synchronization. Focused on bridging the gap between legacy data and modern web interfaces to improve operational efficiency by **35%**.

## PROJECTS

**Vetto — AI Recruitment Platform** — React, Node.js, LLM Prompt Engineering

- Built an end-to-end AI-powered hiring tool that automates candidate screening with bias-free, high-speed LLM workflows.

**Rehnuma Times — AI News System** — Node.js, AI Aggregation Pipeline

- Engineered an automated news collection and verification system delivering real-time, reliable updates with minimal manual input.

**PSL Nexus — Web3 Sports Platform** — React, Blockchain / Web3

- Created an immersive fan-engagement experience integrating blockchain logic for Pakistan Super League audiences.

**NexGen Design — Creative Web Engine** — Next.js, Glassmorphism UI

- Delivered a high-fidelity, performance-first web platform showcasing modern design principles and seamless interactions.

## EDUCATION

**BS Data Science** · FAST-NUCES, Karachi Sep 2025 – Present

- Coursework: Machine Learning, Big Data Analytics, Statistical Modeling.

**A-Levels — Computer Science** · Alpha College, Karachi Sep 2022 – Jun 2024

- Graduated as Salutatorian (Class of 2024).
